EXPERIENCE

Charisol · UX Researcher

September 2024 – Present

MailDrip — Email Marketing & Automation Platform

- Led pricing research with 25+ users that shifted MailDrip from competitor-based to value-based pricing; findings were used to develop a new pricing model based on what users valued.
- Led JTBD research across multiple user groups, identifying Community Managers, Email Marketers, and Business Owners as priority personas with shared underlying jobs; the research led to a product redesign and persona-specific product language.
- Led research into MailDrip's Instant Email flow through user walkthroughs, heuristic evaluation, behavioural data, and competitor analysis; findings and recommendations directly influenced the redesign of the flow.
- Introduced intent-based onboarding questions based on user research, capturing users' goals, roles, and contact volume to support segmentation and personalise the experience and follow-up communication.
- Defined opportunities for MailDrip's AI roadmap by researching how users wanted AI to support email creation beyond templates; identified demand for AI scoring and spam checking, both of which Product prioritised for the next release.
- Turned research into product decisions across Product, Design, Engineering, and Growth, influencing product language, redesigns, engineering fixes, and persona-specific messaging through JTBD, behavioural, and onboarding research.

Muzingo — Music & Gaming Platform

- Reviewed Clarity sessions weekly over three months to identify recurring UX and technical issues, prioritised findings that led to engineering fixes and screen redesigns.
- Led interviews with artists and players that uncovered engagement gaps in the artist partnership experience, findings shaped the v1 partnership strategy and feature priorities.

EARLIER EXPERIENCE

Richforth Tech · Product Designer (Contract)

June – September 2024

Early-stage user research and design for a data dashboard product. Ran feedback sessions with stakeholders to validate direction.

Freelance UX Research & Design

June 2023 – January 2024

User interviews and usability testing across client projects. Delivered research findings and design recommendations.
